

RECORDS OF SAFE AND EFFECTIVE DECOMMISSIONING

[As per 10 CFR 30.35(g) and 30.36(d)]

Licensee: _____ Date: _____

(1) **Records of spills** or other unusual occurrences involving the spread of contamination in and around the facility, equipment, or site may be found in:

- Spill Reports within the MPC binders in Nuclear Medicine
- Other:
- Not applicable

These records may be limited to instances when contamination remains after any cleanup procedures or when there is reasonable likelihood that contaminants may have spread to inaccessible areas as in the case of possible seepage into porous materials such as concrete.

These records must include information on involved nuclides, quantities, forms and concentrations.

(2) **As-built drawings and modifications of structures & equipment** in restricted areas where radioactive materials are used and/or stored and locations of possible inaccessible contamination such as buried pipes may be found in:

- _____
- Not applicable

Substitution of appropriate records of available information concerning these areas and locations is acceptable instead of drawings.

(3) A list of restricted areas and areas outside of restricted areas that meet the following criteria:

Excluding areas containing only non-leaking sealed sources i.e., ^{137}Cs , ^{133}Ba , ^{90}Sr , ^{192}Ir , ^{153}Gd , ^{129}I and ^{60}Co

or

Excluding areas containing byproduct materials with half-lives of less than 65 days

Decommissioning Records per 10 CFR 30.35(g)

- (i) A list of all areas designated and formerly designated as restricted areas to which access is limited by the licensee for the purpose of protecting individuals against undue risks from exposure to radiation and radioactive materials. (i.e., ³H, ¹⁴C Research Labs)
- (ii) A list of all areas outside of restricted areas that require documentation as noted in (1) above for spills.
- (iii) A list of all areas outside of restricted areas where current and previous wastes have been buried.
- (iv) A list of all areas outside of restricted areas, which contain material that would require decontamination or a specific NRC approval for disposal by the licensee, after the license expired.

The list noted above may be found in the following location and is updated every two (2) years:

- Noted below

Research Labs:

Spill Areas:

Buried Waste Areas:

Areas Requiring Decontamination:

- Other:
- Not applicable

- (4) Records of the cost estimate performed for the decommissioning funding plan or of the amount certified for decommissioning. In addition, records of the funding method for assuring funds if a funding plan or certification of financial assurance is used may be found in:

- License management offices
- Other _____
- Not applicable

- (5) "The Timeliness Rule" for effective decommissioning under 10 CFR 30.36(d) requires written notification to the NRC within sixty- (60) days of any of the following occurrences:
- (a) The license has expired or
 - (b) The licensee has made the decision to permanently cease principle activities, at the entire site, or in any separate building that contains residual radioactivity such that the building is **unsuitable** for release in accordance with NRC requirements or
 - (c) There has been a 24-month duration in which no principle activities have been conducted under the license, or at any separate building that contains residual radioactivity such that the building is **unsuitable** for release in accordance with NRC requirements.
- Notification has been filed with the NRC as required
 - Areas, rooms or separate buildings that have been closed-out have been successfully decontaminated in accordance with NRC requirements and records are on file.
 - Not applicable
